

Fertilizerplus®

Premium plant nutrition from ICL

ICL

Fertilizerplus[®]

Find our Polysulphate within
Fertilizerplus, our premium
line of fertilizers

Polysulphate

48 SO₃ - 14 K₂O - 6 MgO - 17 CaO

Main features

- Multi-nutrient fertilizer: sulphur, potassium, magnesium and calcium in sulphate form
- Natural mined mineral (polyhalite): $K_2Ca_2Mg(SO_4)_4 \cdot 2H_2O$
- All nutrients fully available for plant uptake
- Suitable for all kinds of crops and all types of soils
- Extended nutrient availability, less sulphate losses through leaching
- Low chloride, ideal for chloride sensitive crops. Very low salinity index and neutral pH
- Completely natural with a low carbon footprint
- Approved for organic agriculture
- Delivers superior yields, improved quality and increased profitability

Main uses

- For direct application in fields, orchards and plantations
- For bulk blending, compatible with all fertilizers

Polysulphate Premium

45.6 SO₃ - 13 K₂O - 5.6 MgO - 15.4 CaO

Main features

- Uniform, robust spheres of natural, multi-nutrient Polysulphate fertilizer
- Smooth surface protects from abrasion, humidity or damage
- Spherical shape gives consistent flow rate
- Consistent broad spread during application
- Easily blended, attractive appearance in blends with other granulated fertilizers

Main uses

- For direct application in fields, orchards and plantations
- For bulk blending, compatible with all fertilizers
- Ideal for mechanical spreading, good and uniform spreadability in the fields

ICLPotashplus[®]

37 K₂O - 23 SO₃ - 2.8 MgO - 8 CaO

Main features

- Granular premium potassium fertilizer, combining Polysulphate and potash (MOP - KCl)
- Multi-nutrient fertilizer: potassium, sulphur, magnesium and calcium in one application
- Part of the potassium is in sulphate form, reducing the chloride input
- All nutrients fully available for plant uptake
- Suitable for all kinds of crops and all types of soils
- Extended nutrient availability, less sulphate losses through leaching
- Delivers superior yields, improved quality and increased profitability

Main uses

- For direct application in fields, orchards and plantations
- For bulk blending, compatible with all fertilizers

ICLPKplus[®]

Tailor made formulae

Main features

- PK premium granulated fertilizers with Polysulphate inside
- Five nutrients in one: phosphorus, sulphur, potassium, magnesium and calcium in one single application
- All nutrients fully available for plant uptake
- Suitable for all kinds of crops and all types of soils
- Extended nutrient availability, less sulphate losses through leaching
- Delivers superior yields, improved quality and increased profitability

Main uses

- For direct application in fields, orchards and plantation
- For bulk blending with nitrogen (N) fertilizers
